

Slimline Copper Risers

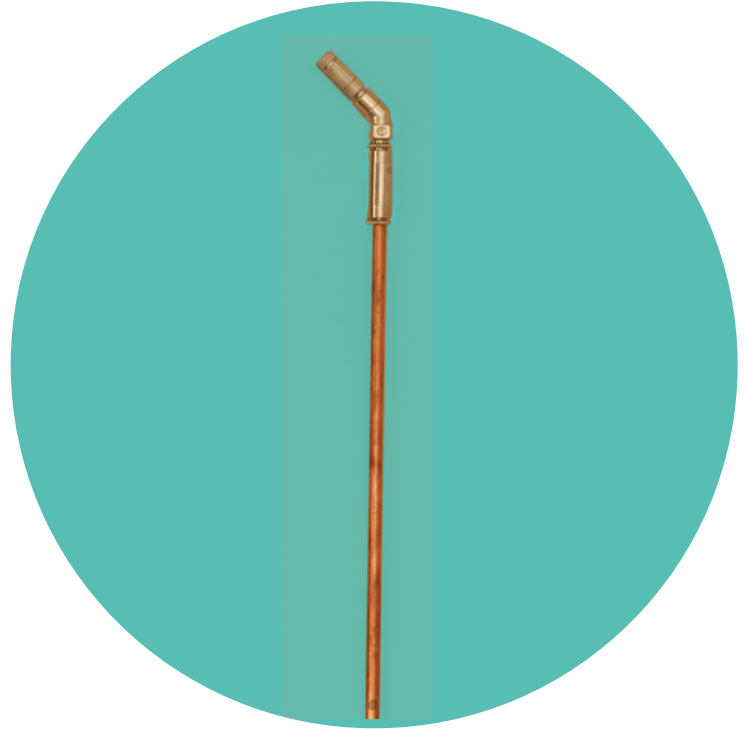

DESCRIPTION

MistAway Slimline Copper Risers are designed with unique interlocking grooves that quickly connect to any of MistAway's nickel plated brass fittings. Made of rigid copper tubing, the riser is durable enough to withstand the harshest outdoor conditions without the possibility of leaking.

MistAway Copper Risers are used for multiple types of installations. Most commonly the risers are used in landscaping to mist under shrubs. Risers may also be used to build a perimeter where no attachable structure is available. While the patina effect only takes a couple of weeks to blend in with most every landscape, black riser wraps are available and easily slide over the copper riser. Stakes hold the risers securely in the ground.

KEY FEATURES & BENEFITS

- Straight, Dual, 90° and 45° Angles
- Quick and easy to install
- Economical
- Light Weight
- Years of lasting durability
- 14" & 32" lengths available
- May be used as extensions

SPECIFICATIONS

Riser Material:	ASTM-B75 Copper
Riser Size:	1/4" O.D. x .030 Wall
Riser Wrap:	3/8" O.D. x 1/4" I.D. Black Nylon
Stake Material:	Galvanized
Riser Fittings:	1/4" Nickel Plated Brass
Pressure Rating:	250 psi
